Software Engineer

Computer Science student at the Open University, expected to graduate in October 2026. Possessing a strong foundation in software development and core computer science principles, including algorithms, operating systems, and data structures. Experienced in developing and scripting with JavaScript and Python, seeking an entry-level position. Available for part-time or full-time employment throughout the year.

Work Experience

Company: Outseer by RSA | Role: Fraud & Cyber Threat Intelligence Analyst | Years: 2024 – Current

- **Script Development:** Write scripts in JavaScript, Python and use technologies like Selenium to optimize workflow and create automation, debug code and perform QA.
- **Quality Assurance:** Conduct QA on products in development, new workflows, and scripts, providing detailed feedback.
- **Cyber Threat Analysis:** Perform deep analysis, classification, and neutralization of a wide range of cyber threats.
- **Networking:** Preforming deep analysis and qualification which demands knowledge in networking.
- **High-Pressure Environment:** Operate under pressure in a critical, goal-oriented environment with 24/7 availability.
- **Team Collaboration:** Demonstrate strong teamwork, adherence to directives, and high communication skills.

Company: Studio51 | Role: Front-End Web Developer (Freelance) | Years: 2022-2024

- **Web Development**: Developed websites using JavaScript, mostly WordPress-based sites.
- **Deadline Management**: Met deadlines and client requirements, translating client needs into actionable goals and specifications.
- **Independent Work**: Demonstrated the ability to work independently, engage in self-directed learning, and solve problems in real-time.

Company: Israel Defense Forces (IDF) | Role: Commander | Years: 2017-2019

- **Team Leadership**: Commanded a security team at the General Headquarters.
- **Operational Readiness**: Maintained operational readiness, conducted briefings, and enforced discipline.
- **High-Rank Interaction**: Worked closely with high-ranking officers, demonstrating restraint and adherence to authority.

Education

Institute: The Open University of Israel (OUI) | Degree: Bachelor of Science (B.sc) | Field: Computer Science | Years: 2023-2026

- **Programming Languages**: Proficient in JavaScript, React, Python, C, and C++.
- **Object-Oriented Programming**: Experienced in OOP methodologies.
- **Diverse Development Environments**: Experience developing in varied environments such as Linux, virtual machines, Windows, and more.
- **Strong Foundation**: Solid theoretical background in computer science, including data structures, algorithms, operating systems, computer organization and advanced tools like databases and cloud platforms (Git, Docker, MySQL, AWS).
- **Self-Taught and Proactive**: Independent and initiative driven with ability to learn anything fast and alone. Researching and troubleshooting.
- **Expected Graduation**: October 2026.
